

# iEVO and WP-i

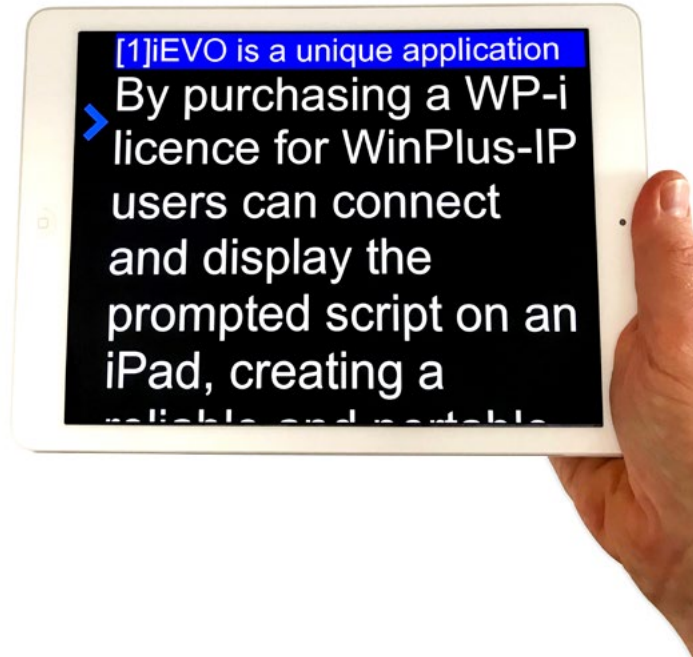

## Studio prompting on an iPad

iEVO is a unique application that allows one or more iPads to be connected directly to WinPlus-IP prompting software and used as a teleprompter monitor, additional reference monitor, or operator preview monitor in any location on the network.

By purchasing a WP-i licence for WinPlus-IP users can connect and display the prompted script on an iPad, creating a reliable, portable monitor for operators and talent.

When connected to the same network, an iPad with the iEVO app will show as a device within the WinPlus-IP device manager. Once activated it will receive the prompting data from WinPlus-IP over Wi-Fi or wired Ethernet adaptor, enabling the script to be rendered in the iPad so that it becomes an additional monitor. This offers a unique and flexible solution for iPad prompting, controlled like a standard on-camera unit.

- > The only prompting app that connects to fully featured prompting software for live productions including news.
- > Unique workflow displays the script in real-time on an iPad.
- > iPad connects as a standard device in WinPlus-IP for easy monitoring.
- > Unique handheld teleprompter solution.
- > Reference/preview monitor solution for any location on the network.
- > Alternative prompter option for jib or Steadicam when weight is an issue.
