Trade up to WinPlus-IP

*Upgrade to the latest Autoscript software
with limited time trade-in packages.*

For a limited time, Autoscript are offering trade-in packages to enable users to upgrade to WinPlus-IP from any existing prompter software system.

The Newsroom or Studio trade-in packages include everything required to replace current prompting software systems at a special discounted price.

Why upgrade to WinPlus-IP?
Benefit from new features designed to improve efficiency and reliability.

> Greater flexibility, faster editing and operation with the simplified, intuitive and customisable user interface.

> Remote production and multi-studio workflows with the new future-proof IP-based architecture.

> Easy set-up, configuration and status-monitoring of all equipment and software.

> New, unique instant redundancy feature for critical live productions.*

> Enhanced operator comfort for optimal performance with the new ergonomic desktop hand control.

> Real-time script display on a lightweight, portable monitor with the unique iEVO app for iPad.**

Existing Autoscript users will be instantly familar with WinPlus-IP thanks to the same workflow and shortcut keys.

*Second application required.   **WP-i Licence required.

Compatibility
The trade-in packages make upgrading easy.

> Compatible with video-based prompter monitors (HD-SDI video output from the Xbox-IP scroll engine).

> Compatible with all existing Autoscript controllers and smart combiner boxes (optional adapter required).

> Compatibility and support for the latest Windows operating systems and latest versions of all major Newsroom Computer Systems.

Optional extended global support contracts, providing the latest feature additions and ongoing maintenance are also available.
